Accumulator Machine

The F-1450 High Speed Accumulator stacks and transfers boxed product to an accumulation table. The F-1450 features adjustable stack heights and options for table overload protection and single or multiple stack elevations. The base machine is designed to stack one size product with moderate size adjustments. An option is available that will allow this accumulator to be highly adjustable to stack and transfer various sized cartons. Primary Markets are Food and Beverage, Pharmaceutical, Consumer goods and Cosmetics.

Advantages:

- Easily integrated into any packaging line
- Handles various size products
- Adjustable stack heights
- Stainless Steel guards and guides
- In-feed conveyor included
- Requires minimal maintenance
- Quick changeovers
- Easy to operate and maintain
- Built from quality materials and parts
- Carton stand for manual case packing included
- Custom designed for your application

Available options:

- Multiple Stack elevations
- Expanded adjustability
- Table overload alert
- Right, Left or In-Line product flow design
- Placement verification.
- Low-level alerts.
- Integration.
