# F-1750

## Fully or Semi Automatic Cartoner / Sleever

The F-1750 CARTONER is available in two configurations, fully automatic and semi automatic hand load. It features a modular design, with interchangeable assemblies for quick changeovers to other product sizes; it is also capable of inserting trays into sleeves or O-cards and will seal boxes using either hot melt or tuck flaps. This is a low cost high quality machine with an uncomplicated design and durable construction which insures that this cartoner will be easy to operate and inexpensive to maintain.

### Advantages and Features:

- Made to run in full or semi automatic modes.
- Modular Changeover Assemblies.
- Custom built to fit a specific product.
- Requires minimal maintenance.
- Easy to operate and maintain.
- Built from quality materials and parts.
- Suited for short or long production runs.

### Available Standard Options:

- Low level sleeve alert
- In-feed Counting System.
- Hot Melt Glue Flap Closure
- Tuck Flap Closure System
- Carton Hand Loading

### Technical Specifications:
